NQT 2025

Interview Questions

Digital Role 2025

Interview Structure for All Roles

Introduction round

Technical questions

HR questions

Role-specific questions

Opportunity for candidate to ask questions

Role-Specific Interview Questions

1. TCS Digital Role Questions Technical Questions (Advanced Level)

Advanced Programming

Data Structures & Algorithms

Full Stack Development

Cloud & DevOps Questions

Project-Based Questions

Core Technical Questions

CS Subjects

HR Questions

Advanced Programming

Explain multithreading concepts

What are design patterns? Explain any two with examples

How would you handle memory leaks?

Explain REST API architecture

What is dependency injection?

Programming Fundamentals

Explain time and space complexity with examples

What is recursion? When would you use it?

Difference between array and linked list

How does garbage collection work?

Explain different sorting algorithms and their complexities

Data Structures & Algorithms

Explain dynamic programming with an example

How would you implement a graph data structure?

Time complexity analysis of advanced algorithms

Implement a solution for the Knapsack problem

Questions on tree traversal algorithms

Full Stack Development

Explain the difference between client-side and server-side rendering

How does JWT authentication work?

Explain MVC architecture

What are microservices and their advantages?

How would you implement responsive design?

Cloud & DevOps Questions

Explain CI/CD pipeline

What is containerization? Explain Docker basics

How does load balancing work?

What is the difference between IaaS, PaaS, and SaaS?

Basic AWS/Azure service questions

Project-Based Questions

Explain your most complex project in detail

What challenges did you face during your project implementation?

How did you ensure code quality in your projects?

Have you implemented any optimization techniques in your projects?

How would you scale your application if user traffic increases?

Core Technical Questions

Explain the architecture of your project (microservices, APIs used?)

Write a program to reverse a linked list.

What is a binary search tree? In-order traversal code?

Difference between stack and queue. Implement using array.

Explain REST API and its methods.

Explain JVM and memory management in Java.

CS Subjects

OS: **Deadlock**, **Process vs Thread**

DBMS: **Normal forms**, **Indexing**, **SQL joins**

CN: **OSI layers**, **TCP/IP model**

DSA: **Sorting**, **recursion**, **time complexity**

HR Questions

How do you handle pressure?

Describe a time you worked in a team conflict.

Why should we hire you for a digital profile?
