NQT 2025

TCS Interview for ECE/EEE Students

Prime Role 2025

The TCS Prime interview process typically comprises three rounds:

Technical Round (TR)

Managerial Round (MR)

HR Round

Technical Round (TR)

Focuses on assessing your technical knowledge, including programming, data structures, algorithms, and domain-specific concepts.

Expect questions on Object-Oriented Programming (OOP), SQL, and your academic projects.

Managerial Round (MR)

Evaluates your problem-solving abilities, decision-making skills, and how you handle real-world scenarios.

May include situational questions and discussions about your leadership experiences.

HR Round

Assesses your cultural fit, communication skills, and willingness to adapt to TCS's work environment.

Common questions revolve around your strengths, weaknesses, and career aspirations.

Programming & Data Structures

Languages: Proficiency in C, C++, Java, or Python is expected.

Write a program to check if a number is prime.

Determine if a string is a palindrome.

Implement sorting algorithms like bubble sort or quicksort.

Reverse a linked list.

Count vowels in a given string

Oriented Programming (OOP)

Encapsulation, **Inheritance**, **Polymorphism**, **Abstraction**,
class, **Object**

Differences between classes and interfaces.

Overloading vs Overriding

SQL & Database Management

Write a query to retrieve the top 10 highest salaries from a table.

Explain the use of GROUP BY and HAVING clauses.

Differentiate between WHERE and HAVING.

Discuss normalization and its types.

Domain-Specific Knowledge (ECE/EEE)

Differences between microprocessors and microcontrollers.

Working principles of transformers and their applications.

Basics of signal processing and communication systems.

Applications of IoT in real-world scenarios, such as attendance management systems.

Project Discussion

Be prepared to discuss your academic and personal projects in detail:

Clearly explain the project's objective and your role.

Discuss the technologies and tools used.

Highlight challenges faced and how you overcame them.

What to Expect in the Managerial Round

Problem-solving abilities

Decision-making skills

Teamwork and leadership qualities

Adaptability to changing scenarios

Communication skills

Understanding of TCS's work culture and values

1. Why are you transitioning from ECE/EEE to IT?

"During my academic projects, I developed a keen interest in programming and software development. The logical problem-solving aspects of IT resonate with my analytical skills honed during my ECE/EEE coursework. I'm eager to apply these skills in the IT industry and continuously learn and grow."

2. Describe a challenging situation you faced and how you handled it.

"In my final year project, we faced a significant technical hurdle that threatened our timeline. I organized additional team meetings to brainstorm solutions, delegated tasks based on individual strengths, and sought guidance from faculty advisors. Through collaborative effort, we overcame the challenge and completed the project successfully."

3. How do you handle conflicts within a team?"

"I believe in open communication and understanding differing perspectives. When conflicts arise, I encourage team members to express their viewpoints and work collaboratively to find a mutually acceptable solution, ensuring the team's objectives remain the priority."

4. Are you open to relocating or working in different time zones?

"Yes, I am open to relocating and adjusting to different time zones. I view such opportunities as avenues for personal and professional growth, allowing me to gain diverse experiences."

5. "What do you know about TCS and its recent achievements?"

"TCS is a global leader in IT services, known for its innovation and commitment to excellence. Recently, TCS was recognized for its advancements in cloud computing solutions and its efforts in digital transformation across various industries."
